

CERTIFICATE

No 19 / 4784 / Opexity / April 2025

This is to certify that Mr/Ms

Renata Tomaszewska

has successfully completed the training

"Industry 4.0 and cybersecurity"

on 28th April 2025

The training program included:

- Collecting and inferring from data in the Industry 4.0 concept
- Learning the basics of artificial intelligence and how it can be used in an industrial environment
- Learning about the possibilities of using computer simulation and 3D modeling to conduct optimization experiments
- Learning about risks and threats in the context of cyber security and practical tips to enhance security in artificial intelligence, OT and IoT systems
- Effective data management in the enterprise – a data-driven organization as a key to increasing competitiveness
- Practical examples of using algorithms and machine learning models in an organization
- Participating in practical workshops using VR technology to simulate a training process in a manufacturing environment
